### Aims, Scope, Organization

The international Internet-based Journal *Intersecții/Intersections*, ISSN 1582-3024 aims at linking together professionals from all over the world in a space common for everybody, the Internet, and in a simple and dynamic manner. Mainly scientists and academics are the target public of this journal.

As a scope or domain, *Civil Engineering and Constructions* is the principal domain. However other domains are encouraged to join this publication. Especially domains that frequently interfere with the principal domain are envisioned.

*Intersecții/Intersections* is a multi-language internet-based journal (English and, eventually, other languages desired by the local *Number*, or *Section*, editorial team).

An *Editorial Board* leads the journal. It includes international renowned scientific personalities from a multitude of countries and institutions.

The journal has the professional and the scientific support from universities, institutions, associations and societies.

Organization of the journal is shortly described in what follows:

- each year the journal has a *Volume* administrated by the *Editorial Board*;
- each *Volume* is compounded from *Numbers* (or *Sections*) with particular names as: "Geotechnical and Foundations", "Roads", "Structural Mechanics", "Physics of Constructions", "Composite Materials", "Constructions Materials", "Constructions and Environment" etc;
- the *Numbers* may appear simultaneously in many countries, universities and societies around the world. For the moment the main location is <http://www.ce.tuiasi.ro/intersections>;
- though, as a rule, the *Numbers* appear at the beginning of the year, at the request of *Number's* editors this can happen later, too. In order to be initiated, a *Number* must have an *Editorial Team* accepted by the *Editorial Board* and at least three scientific papers;
- during the year, the *Numbers* accept new contributions, until December 15. The opinions of the readers and the answers of the authors will also be published. The papers can be improved or even retracted by the authors. At the end of the year, a CD with the content of the *Volume* (including all the *Numbers*) is issued and sent to the Romanian National Library and to other libraries and organizations that made agreements with the Journal.

The Journal "Intersecții/Intersections" is published under the names of the professional and scientific organizations that support it, the Publishing House of the Academic Society "Matei-Teiu Botez" having only the role of logistic support for the *Editorial Board*.

When an institution expresses its interest in supporting the journal, the *Editorial Board* examines it. If accepted, the institution is listed on the main technical page of the journal. Then, the listed institution is invited to name a person as a member of the *Editorial Board*. This way, the supportive institution will have a representative in leading the journal.

Sponsors are welcome and encouraged, in order to have better logistic means. They should address to the *Editorial Board* for details.

The copyright of published papers belongs to the Academic Society "Matei-Teiu Botez". Writing papers to the Journal "Intersections" implies that the authors agree to cede their rights to the Academic Society "Matei-Teiu Botez". However, the responsibilities about the papers' contents belong to the authors.

*Note:* The cover and general design of this Journal is a copyright of Mihai Albu, [mitudamir@yahoo.com](mailto:mitudamir@yahoo.com). Details of design of this Journal and web pages design and maintenance are copyright of FidelIU Paulet-Crainiceanu, [fidelIU@ce.tuiasi.ro](mailto:fidelIU@ce.tuiasi.ro).
